

ALUMINUM & COPPER ROOF DRAINS ACCESSORIES

3-BOLT ALUMINUM CLAMPING RING

NEW INSTALLATION • RETROFIT

PRODUCT INFORMATION

SKU: P-90146

FEATURES:

- Heavy duty die-cast Aluminum with powder coated Aluminum construction for durability
- Features 9 drainage channels to allow for full drainage
- Flange designed for an optimum seal with roof flashing
- Compatible with all 3-Bolt Aluminum and Copper drains
- Reversible design allows for elevation drainage options

APPLICATION:

Clamping rings in roof drains serve to secure the drain assembly firmly to the roof structure, ensuring a watertight seal. They help maintain the stability of the drain by preventing movement caused by thermal expansion, contraction, or environmental factors. By effectively compressing the roofing membrane against the drain, clamping rings minimize the risk of leaks and water infiltration. Additionally, they facilitate easy installation and maintenance of the roof drain system, contributing to the overall durability and performance of the roofing system.
