

ALUMINUM DRAINS

ALUMINUM TEMPORARY DRAINS

PRODUCT INFORMATION

SKU: P-TEMPFA-275
P-TEMPFA-375

FEATURES:

- One-piece spun Aluminum flat deck drain with a 14" flange
- Features a 1.6mm thickness for both the stem and deck
- 12" drain stem length for versatile application
- Ideal for temporary use in various drainage situations

APPLICATION:

Temporary drains are used in roofing applications to manage water runoff during construction or maintenance. They help prevent water accumulation on the roof, reducing the risk of leaks, structural damage, and safety hazards. Temporary drains are particularly useful in areas where permanent drainage systems are not yet installed or when immediate water removal is necessary. Their easy installation and removal make them ideal for protecting roofing materials and ensuring a safe working environment.
