

GAS LINE MARKER

PRODUCT INFORMATION

SKU: P-GLMRK-48

FEATURES:

- Highly visible 4' fiberglass pole for clear marking
- Cast Aluminum base securely attaches to the gas line support base for stability
- Safety yellow fiberglass pole matches gas lines for easy identification
- Enhances safety and visibility, even in heavy snow or during snow removal
- Durable yet flexible pole resists breakage, ensuring long-lasting performance

APPLICATION:

Gas line markers are crucial for identifying the location of gas lines that may run beneath or near roofing structures. These markers help ensure the safety of roofing professionals during installation, maintenance, or repair work by preventing accidental damage to gas lines. Clearly marked gas lines facilitate compliance with safety regulations and assist in planning for future roofing projects. By using color-coded markers that adhere to industry standards, workers can quickly recognize potential hazards, thereby minimizing the risk of gas leaks or explosions during roofing operations.
